

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	10 July 2026
Team ID	
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Team Discussion

The project team conducted a brainstorming session to identify current challenges in the electric vehicle (EV) sector. Team members discussed several problems related to EV adoption, charging infrastructure, battery performance, and data analysis. After evaluating different ideas, the team selected the problem of analyzing and visualizing electric vehicle charge and range data because it has practical applications and can help users make informed decisions.

Problem Statement

Electric vehicle data such as battery capacity, charging time, driving range, charging stations, and market trends is distributed across multiple sources, making it difficult for users to analyze and compare vehicles. There is a need for an interactive visualization tool that consolidates this information and presents meaningful insights through dashboards.

Step-2: Brainstorm, Idea Listing and Grouping

During brainstorming, the following ideas were generated:

Idea No. Idea		Category
1	EV Charging Station Locator	Navigation
2	Battery Health Monitoring System	Battery Management
3	Electric Vehicle Sales Analysis Dashboard	Business Intelligence
4	EV Charge and Range Analysis Dashboard	Data Visualization
5	EV Recommendation System	Artificial Intelligence
6	Real-Time Charging Availability Dashboard	Smart Infrastructure
7	EV Cost Comparison Dashboard	Financial Analysis
8	Carbon Emission Reduction Dashboard	Sustainability

Step-3: Idea Prioritization

The ideas were evaluated based on **Innovation, Feasibility, Availability of Data, Implementation Complexity, User Benefit, and Project Scope.**

Idea	Innovation	Feasibility	Data Availability	User Benefit	Priority
EV Charge and Range Analysis Dashboard	★★★★★	★★★★★	★★★★★	★★★★★	1
EV Sales Analysis Dashboard	★★★★☆	★★★★★	★★★★★	★★★★☆	2
EV Recommendation System	★★★★★	★★★☆☆	★★★☆☆	★★★★★	3
Charging Station Locator	★★★★☆	★★★★☆	★★★★☆	★★★★☆	4
Battery Health Monitoring	★★★★★	★★☆☆☆	★★☆☆☆	★★★★☆	5
Carbon Emission Dashboard	★★★★☆	★★★★☆	★★★★☆	★★★☆☆	6
