

Project Design Phase
Problem – Solution Fit Template

Date	13 July 2026
Team ID	
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	2 Marks

Problem – Solution Fit :

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ Understand the existing situation in order to improve it for your target group.

Template:

Target Customers / Users • Electric Vehicle buyers • Automobile manufacturers • EV researchers and analysts • Government agencies • Students and educators	Customer Problems • Difficulty comparing EV models across different brands. • EV information is scattered across multiple sources. • Limited understanding of battery capacity, charging time, and driving range.	Current Solutions • Manufacturer websites • Online EV comparison websites • Spreadsheets and static reports • Manual data analysis using Excel
Limitations of Current Solutions • Data is not centralized. • Limited visualization and comparison features. • Time-consuming manual analysis. • Difficult to gain insights from large datasets.	Proposed Solution Develop an interactive Tableau dashboard that integrates multiple EV datasets and provides dynamic visualizations, filters, KPIs, and story points for easy analysis and comparison of electric vehicles.	Value Proposition • Centralized EV information • Interactive and user-friendly dashboard • Faster data analysis • Better decision-making for EV buyers and researchers • Improved understanding of EV trends and performance
Key Features • Multiple dataset integration • Interactive filters • KPI cards • Bar charts, Pie charts, Line charts, Scatter plots, Tree maps, Heat maps, and Maps • Tableau Story for insights	Expected Benefits • Simplifies EV comparison. • Helps users choose the most suitable EV. • Supports research and market analysis. • Encourages EV adoption through better data visualization. • Saves time by providing all important insights in one dashboard.
