

Project Design Phase
Proposed Solution Template

Date	13 July 2026
Team ID	
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Electric vehicle (EV) users often find it difficult to compare EV models based on battery capacity, driving range, charging time, and manufacturer. Existing data is scattered and difficult to analyze, making it hard for customers and researchers to make informed decisions.
2.	Idea / Solution description	Develop an interactive EV Analysis Dashboard using Tableau that visualizes EV data such as vehicle brands, battery capacity, driving range, charging time, charging speed, and model comparisons. The dashboard will provide filters, charts, maps, and KPIs to help users easily analyze and compare electric vehicles.
3.	Novelty / Uniqueness	The dashboard combines multiple EV performance metrics into a single interactive visualization. Users can dynamically filter data by brand, model, battery type, charging speed, and range, making analysis simple and user-friendly.
4.	Social Impact / Customer Satisfaction	The project increases awareness about electric vehicles and helps consumers choose EVs based on performance and charging efficiency. It also supports environmental sustainability by encouraging EV adoption through data-driven decision-making.
5.	Business Model (Revenue Model)	The dashboard can be offered as a subscription-based analytics platform for automobile companies, dealerships, and EV researchers. Revenue can also be generated through premium reports, consulting services, advertisements, and partnerships with EV manufacturers.
6.	Scalability of the Solution	The solution can be expanded by integrating real-time EV charging station data, live vehicle prices, user reviews, AI-based recommendations, and global EV market trends. It can also be deployed as a web

		application or mobile application for wider accessibility.
